When ‘Add to calendar’ is chosen, a box will pop up to allow you to enter time to spend on activity and the date and time for the activity.

I would prefer it to be draggable to the calendar and then to be able to drag over the time you need and the travel time automatically adds as padding to either side. But this will not be mobile-friendly as the screen will be too small.

Maybe you can add it and then drag the boxes around on the itinerary.

Either I will have a ‘Create pdf’ option or I’ll have a ‘Send to your email address’ option for the completed itinerary.

Drag and drop - optional
